ABSTRACT

The main moments of historic-ethnographical importance of development of the main traditional branches of craftsmanship of Ganja in this scientific work for the first time has been systematic investigated on the basis of innovative technologies and facts. Also were researched the basic skill characteristics of different wares of these traditional handicraft branches. Internal conditions of craft department reflected a sort of employment of his owner. In these departments worked the master and his pupils. In a life of the population of Ganja the role of craft products was great. These products were widely used inhabitants of Ganja they decorated conditions of living rooms, with them filled up a dowry of brides. The dresses created in local departments, suits and caps were an integral part of an attire of town-dwellers. In comparison with villages though the national clothes in XX century began to supersede them gradually.

Keywords: Ganja, handicraft traditions, historic-ethnographical research, Azerbaijan, innovative technologies

INTRODUCTION

Historic and ethnographic exploration of problems and branches of crafts is very important, as a way of studying along with history and culture of the people, years generated political-economical and relations of production. Research of traditional wares of handicraft kinds of Ganja of the XIX-XX centuries on the basis of innovative methods is very important and necessary. During our researches in 2012-2013 years we determined some new scientific arguments and facts in this field. The increase in quantity of handicraftsmen in a city directly has been bundled to population growth. Closely bundled to an economy and a daily life of the people, craft employment were one of the basic carriers of national traditions. The competition of production of production plants and factories has not reached still serious level and consequently was created a favorable condition for spreading of traditional occupations there. In addition, products of these craft branches have been closely bundled to a life and traditions of the people, and it would be difficult to replace with their factory production [1]. In the specified period of history in Ganja developed basically carpet weaving, weaver`s business, craft of the tailor, squeeze men, forge and a jeweler, trades of dyer, the stone mason, the cooper and leather dresser, weapon business and other similar craft branches. Among these crafts especially developed carpet weaving. To so wide development of carpet weaving promoted availability of raw materials. In addition carpets were very widely used in a population life-both as furniture, and as a curtain, both as sand bed and as a coating for a floor. In carpet weaving have been held basically women. It has been bundled by that in a Muslim society of the woman preferred to work in house conditions. However also know cases when men were occupied with this craft [2].
GOALS AND OBJECTIVES OF RESEARCH

The main aim of our investigations is research of significance of local traditional handicraft patterns as a source in research of features of urban culture in Ganja.

During this period tailors and hatters created both national clothes, and clothes in style of the European fashion. According to the spent explorations there are exact data on wide development of a jeweler in Ganja in the end of XIX century – in a beginning of XX centuries. Jewelers basically fabricated ornaments to order. Among them there was a specification. Jobs of skilful masters amazed even foreigners. Development of trading and economic relations of Ganja with the next states promoted recognition of local jewels abroad [3].

From the point of view silkworm breeding development and it’s preparing technology there were two main forms of production: so-called raw silk weaving and felt weaving. In this important technological process it has such kind of production stages as cocoon opening, silk initial processing, preparing of raw silk, weaving technology, painting and decoration. In the ancient Ganja during the stage of the Middle Ages the great progress of silkworm was represented by raw silk weaving. For this reason, on the basis of local traditions production of delicate silk textiles from raw silk. There were made such kind of important samples of art as atlas and kelaqai (silk kerchief) [4]. We must pay attention to the moment that differs from the other silk fabrics, kelaqai was prepared by specialists. But distinctly of production of raw silk that was city silkworm breeding and was man activity, felt production was woman work. In Ganja, that know as the ancient cultural centre, the saddle-making handicraft differed from others with rich old traditions. First time preparation of the vehicles was house profession. But afterwards saddle preparation needed of qualified skilled masters, so a new type of art saddle-making, started to form. Historically the traditional art of saddle-making in Ganja developed in direction of cargo and passenger saddle making. The art of saddle-making within the local saddle-types and their components were determined on a specialization. The production of cargo or pack-saddle a rule was engaged by pack-saddle maker. For this reason, in most cases, the profession was called trade of pack-saddle maker [5].

On a ground classifying crafts it has been defined that by the end of XIX century a number of fashionable trades began to disappear. Among them were wool-carder, hatcheller, selsbchy, dhulfachy, carriers. They have got rid of and have been replaced by representatives of new crafts [6-7]. Distribution of experts of certain crafts on quarters and neighbouring communes was prominent of crafts. For example, it is possible to recollect. In these neighbouring communes functioned craft departments.

Along with the works and notes of medieval authors and travellers, a lot of material samples, found in the territory of ancient Ganja, also found in Mingachevir and concern to Middle Ages trough, ladle, wooden threshing board, shows that in Ganja wood treatment and sculptor art have a rich tradition. Wood treatment products historically have been represented in various fields of social and cultural life in Ganja as the kitchen appliances: trough, quadrupeb, rolling-pin, mortar and pestle, ladle, spoon, trough, also transport means: sleigh, car, and ski. Weaving tools: comb, face. Household tools: harrow, wooden plow, threshing board, spade, wooden shouvel, pitchfork and rake. Musical instruments: saz, ud, tar, chamahcha, tambourine, drum [5].

SOLVING METHODS OF PROBLEM AND TESTING

During these scientific investigations have been used some main innovative academic methods:
1. Determination of traditional methods and materials of handicraft wares on the basis of innovative roads;

2. For the first time research of problem of genesis of handicraft traditions on the basis of production technology and technique of local craftsmanship patterns of ancient and classical periods;

3. Foundation of the new scientific direction on ethnography and ethnology on the basis of investigation of sustainable historical features of handicraft branches in research of the historical past of formation and development of Urban culture;

4. Investigation of importance of the handicraft patterns as the main source in research of characteristics of formation and development of urban culture (formation process of the features of urban culture) for ancient and classical periods on the basis of scientific arguments.

The craftsmanship of carpet-making is one of the important cultural achievements of the Eastern people in Azerbaijan production of carpets appeared during I millennium BC. But carpet–making in the first period of Middle Ages has turned to the independent sphere of craft. In Ganja, that has minimum 4000 years history, production of carpets differed with quickly development. In this ancient city, that is native land of great Azerbaijani poet and thinker Sheikh Nizami Ganjavi, were weaved very uncial, inimitable kinds of carpet. In Ganja, that has rich traditions, were prepared carpets with various characteristics. For this reason one of Azerbaijani carpet groups are Ganja carpets or (Ganja–Kazakh carpets). Pay attention that in Ganja namely local kinds of carpets–palaz (carpets without of pile) are weaved [6]. These carpets that are producing by local inhabitants are differing with specific handicraft features. Majority of local wool products, richness of natural colours and existence professional carpet-making women made for quick development carpet making craftsmanship in Ganja and in its surround territories [3].

In whole at the beginning of XIX- XX century the quality of carpet craftsmen were more than XX thousand. Such kind of carpets without pile as phalas, kilim, holdall, bead, verni, sumach, heybe, carpet – bag were different with qualities and coloured ornamental elements. Especially we must say that Ganja carpets have always been valued for its quality and art characteristics. As the result of in XIX – XX centuries most of Ganja carpets were showed in world in fluent exhibition. In 1850, 1852 and 1912 years in Tbilisi, in 1896 in Nizhny Novgorod, in 1900 year in Paris, in 1911 year in Turin. Ganja carpets were showed and highly in international exhibition. Nowadays, Ganja’s carpets are kept in authoritative museums of world, and also in collection of different people. The studying of Ganja’s carpets for art characteristics quality form science point of view is very important for investigation heritage of world culture [7].

Made of precious metals gold and silver jewelleries, that prepared by Ganja masters, are divided into 4 main groups for wearing and putting: Neck jewelleries - it is included such kind of jewelleries, that gold piece coin, imperial, cardamom or barley, medallions, bracelets, different kinds of beads and etc., jewelleries for arms and fingers – this group include bracelets, bangles and rings with various precious stones as (turquoise, rubies, pearls and etc.), head jewelleries – skull-cap and others, jewelleries for clothiers [8].

From the construction point of view, samples of pottery, that concern to Antique period, also to the period of Hellenism in Ganja, differed in various forms as pictorial vases, ceramic figures, connected dishes. During the end of Middle Ages and New Period in Ganja and its regions ceramic has following kinds as building ceramic materials, unglazed ceramic products, glazed ceramic products. For Middle Ages and New period among pottery products
of Ganja ceramic samples as clay construction materials have great importance. First of all, glazed bricks that were used in construction of most buildings in the XVII-XVIII centuries, and also in great monuments and the main construction material - air-dried bricks, attracted attention [9].

The formation of pottery on the territory of ancient Ganja is concern to the stages of ancient history. Basis on research works carried out by the various persons in XIX century and experts-archeologists at the beginning of XX century in old ruins of the city and surrounding areas there were found different samples of pottery. In the first half of the XVIII-XIX centuries, as well as in other parts of Azerbaijan, in Ganja household objects, forging weapons and jewellery that made from metal were decorated with different technical ways. As in many places, production of wool, cotton and silk in and around Ganja made necessary emergence and development of weaving. Becoming weaving one of the ancient spheres of crafts in and around Ganja was connected with the rich raw material base here. Presence of useful plant species for textile, including cotton, high level development of wool area of agriculture-sheep and goat breeding, camel breeding, horse breeding, presence of cotton cropping in Middle Ages and finally, regular expansion of silkworm breeding in this area created a foundation for growth of weaving here [10]. In addition, during the research work in Ganjabasar and other territories monuments there have been found whole and parts of weaving loom and different sizes of clay and bone samples that consist to weaving [1]. Traditional spheres of crafts are invaluable and reliable sources of studying of culture, aesthetic taste, outlook (world outlook) of the Azerbaijan people.

DISCUSSION OF RESULTS

1. Investigation of the main traditional craft branches on the basis of new, innovative methods and technologies is very important. Results of these researches show the significance of different patterns of craftsmanship kinds as a source in studying of historical past of nations.

2. In traditional production of cloth manufactory trade historically played an important place. This kind of craft that developed on the basis of local raw materials was tied with cotton-growing economy. Since the time of the early Middle Ages, Ganja as other big cities has been the main center of Azerbaijan in production of cotton cloth. In this ancient city printed cotton and calico fabrics have been widely produced. In traditional cloth productions the main place took the urban mines. In the early 30s of the XIX century in Ganja there were more than 164 people - weaving.

3. The majority of these artists were weaving. In Ganja, which was the most important center of cloth production were produced different kinds of cotton cloth. Only in the 30s of the XIX century in Ganja were presently working 30 cloth bench. During one year this machine were producing 2000 of white cloth, 200 top of red cloth (shale) and nearly 400 thin cloths spoke [4].

CONCLUSION

1. Internal conditions of craft department reflected a sort of employment of his owner. In these departments worked the master and his pupils. In a life of the population of Ganja the role of craft products was great. These products were widely used inhabitants of Ganja they decorated conditions of living rooms, with them filled up a dowry of brides. The dresses created in local departments, suits and caps were an
integral part of an attire of town-dwellers. In comparison with villages though the national clothes in XX century began to supersede them gradually.

2. It also has been bundled to accruing arrival to Ganja representatives of other nationalities. Therefore changes in clothes were more marked. Only female ornaments as an attire constituent part left the national feature. At this time there were fashionable ornaments on a breast, hands, set pins and on clothes [11].

3. Studying of craft problems actually and in the modern world in sense of the decision of professional problems. From the investigated national employment carpet weaving, the jeweler, a stone dressing and strenuously develop on the basis of ancient traditions already dying out ancient trades, such as a pottery and an art embroidery. Each area of Azerbaijan possesses characteristic environmental resource bases for it and it promoted development of various crafts.

4. Thus, a number of employments in Ganja, during the period since XIX century to the middle of XX century, differed from crafts of other areas of the country. It was first of all the trades bundled to a spreading of a city and population grown has increased demand for craft products. Under such circumstances the handicraft work could not keep the natural character [12].
